Education

Amity University , Bachelor of Technology in Computer Science and Engineering	Aug 2023 – May 2027
- Location: Lucknow, India - CGPA: 8.85	
City Montessori School , Higher Secondary	April 2022 – May 2023
- Location: Lucknow, India - Percentage: 95%	

Experience

Graduate Engineer Trainee , Solarwiser	July 2026 – Present
Contributing to engineering projects and operations as part of the graduate training program.	
Associate Intern , A.K Enterprises – Lucknow, India	April 2026 – July 2026
- Developed a MERN-based solar power prediction and monitoring platform for managing solar installations and energy analytics. - Built RESTful APIs and integrated AI/ML prediction modules to generate daily, monthly, and annual solar energy forecasts using installation and weather data. - Designed interactive analytics dashboards featuring solar generation trends, prediction history, and downloadable performance reports. - Implemented data visualizations for monitoring energy output, inverter efficiency, DC/AC ratio, temperature impact, and cloud coverage. - Developed secure user management workflows including installation onboarding, report generation, and automated prediction refresh pipelines.	

Projects

Gaffer Desk Live GitHub	2026
Tech Stack: MERN, Gemini API, Tailwind CSS, MongoDB, Recharts - Built an AI-powered football operations platform for FIFA/EA FC Career Mode focused on squad analysis, player development, and tactical planning. - Integrated Google Gemini Vision API to extract player names, positions, and ratings from uploaded in-game screenshots. - Developed a tactical pitch visualization system with dynamic formation mapping using React and CSS grid layouts. - Implemented squad analytics including player growth tracking, tactical alerts, and AI-generated squad recommendations.	
My-Day Live GitHub	2026
Tech Stack: MERN, Redux Toolkit, JWT, Tailwind CSS, MongoDB - Developed a secure digital journaling platform for creating, editing, and organizing personal journal entries. - Implemented JWT authentication with secure HTTP-only cookies, protected routes, and server-side validation. - Built responsive user interfaces using React, Tailwind CSS, DaisyUI, and Redux Toolkit with RTK Query. - Designed RESTful backend APIs using Node.js, Express.js, and MongoDB for scalable journal management. - Optimized user experience with clean UI architecture and seamless CRUD functionality across authenticated sessions.	

Technical Skills

Core CS Concepts: Object-Oriented Programming, Data Structures & Algorithms, Operating Systems, DBMS, Computer Networks

Programming Languages: Java, JavaScript, SQL, HTML/CSS

Frameworks & Libraries: React.js, Node.js, Express.js, Bootstrap, Tailwind CSS

Developer Tools: Git, GitHub, VS Code, Postman, MongoDB Compass, Cursor

Databases & Platforms: MongoDB, MySQL, REST APIs

Certifications

Stress Management , NPTEL	2025
Certified Course Completion	
The Web Developer Bootcamp , Udemy Colt Steele	2025
Full-Stack Web Development Certification
